EXPERIENCE

Founder | DailyGeeta — *Acquired*

Apr 2025

- Built and launched a subscription platform delivering personalized Bhagavad Gita teachings through daily email and AI-generated audio experiences.
- Scaled to 4,000+ visitors, 200+ users, and 20+ paying subscribers, reaching \$40+ MRR through organic growth.
- Engineered an automated multilingual delivery pipeline using Sarvam AI and Zoho ZeptoMail, generating and distributing localized audio content across multiple Indic languages.
- Owned product, engineering, growth, and monetization end-to-end as a solo founder, leading to acquisition at a 7.5× MRR multiple.

EDUCATION

United College of Engineering and Research

Prayagraj, UP

Bachelor of Technology in Computer Science

Oct. 2023 – May 2027, GPA: 7.9/10

PROJECTS

AltmanGPT | *React, Vite, Node.js, Express, Pinecone, Gemini 2.5 Flash, Firebase Auth*

Oct 2025

- Built an AI-powered digital twin of Sam Altman using RAG, indexing and retrieving insights from his essays and blog posts through Pinecone vector search.
- Implemented a persona-switching architecture featuring a “Roast My Startup” mode alongside a voice-first interface with real-time speech-to-text interactions.
- Shipped a production-grade React/Vite frontend with Firebase authentication and a Node/Express backend powered by Gemini 2.5 Flash, serving 300+ users.

TimeCapsuleMail | *React, Node.js, Express, MongoDB, Resend API*

Nov 2025

- Built an anonymous messaging platform that allows users to schedule emails for future delivery, transforming messages into digital time capsules.
- Designed a MongoDB-backed scheduling and queuing system that reliably triggered deliveries via the Resend API, handling 500+ scheduled sends with zero missed deliveries.
- Launched and grew to 200+ users within four weeks through organic sharing, with 15% of users creating multiple time capsules.

RiddleBox | *React, Node.js, Express, WebSockets*

Sept 2025

- Built a real-time multiplayer platform where players compete to solve AI-generated computer science riddles using WebSockets for live synchronization.
- Designed room matchmaking, leaderboard synchronization, and scoring systems that maintained sub-200ms state updates across concurrent players.
- Developed and launched the entire stack solo, attracting 150+ registered players after release.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C, C++

Frontend: React, Vite, TailwindCSS, shadcn/ui, Framer Motion

Backend & Databases: Node.js, Express, REST APIs, WebSockets, MongoDB, PostgreSQL, Redis, Firebase

AI: RAG Pipelines, Pinecone, Gemini API, OpenAI API, Sarvam AI

Cloud & DevOps: Docker, GCP, Vercel

Messaging & Communication: Resend API, Zoho ZeptoMail

Tools: Git, GitHub, Postman, VS Code

ACHIEVEMENTS

Silver Medalist, Turbo AI State Hackathon (2024), competing against teams from across Uttar Pradesh.

Led Events & Management for the GeeksforGeeks campus chapter, organizing technical workshops and community events for 80+ students.
